

T

iTILL

POINT OF SALE TILL SOFTWARE

iTILL

iTill is a PoS built specifically for use in the FE and SF environment, taking user from your MIS to load on to the till to either pay with their ID Card for FSM or Top Up via a payment portal online, by either student or their parents/guardians. The software runs on Poindus Till Hardware which are supplied also by Auxilium.

Revolutionise Your Point of Sale with iTill & iStock

Discover the seamless integration of iTill and iStock, the ultimate point-of-sale and stock management solution designed to enhance efficiency, streamline transactions, and provide full control over your business operations. Whether you're managing sales at the till or overseeing inventory behind the scenes, our software delivers the functionality and ease-of-use you need.

iStock: The Power Behind Your Tills

Simplified Product Management

Easily add and edit products directly from iStock, ensuring your tills always have up-to-date pricing, pack sizes, and location-specific pricing. Barcodes can also be managed effortlessly, making scanning and sales smoother than ever.

User & Permission Control

Administrators can manage user access with ease—add new users, update existing accounts, and modify passwords to ensure security and compliance at all times.

Manual Top-Ups for User Purses

iStock enables manual top-ups for staff and student accounts, providing flexibility for bursaries, allowances, and other financial support systems.

Real-Time Till Monitoring

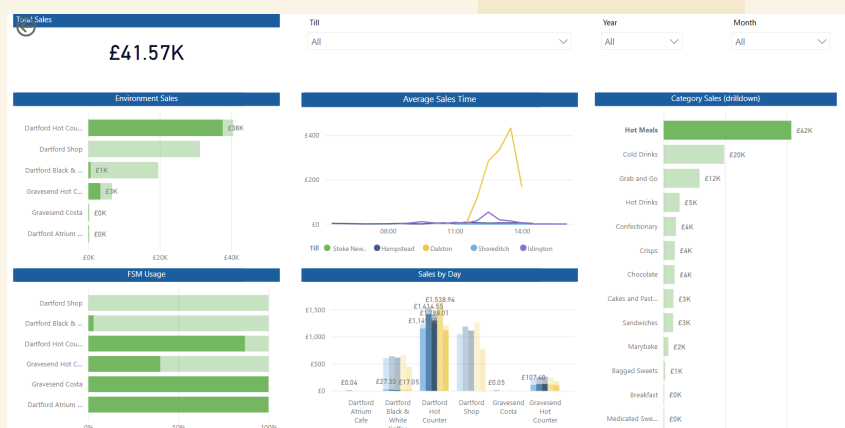

Stay informed about the operational status of your tills. Monitor when each till last synchronized, ensuring smooth business operations with minimal disruptions.

Quick Access to Till Web Pages

Effortlessly navigate to any till's web page via iStock by simply clicking on its IP address, enabling faster troubleshooting and setup.

Comprehensive Reporting

Gain valuable insights with till reports and purse spending reports, helping you make data-driven decisions to optimise performance and manage finances effectively.

FEATURES

FSM / bursary purses (staff/ student accounts can be topped up and accessed at the tills using their staff/ student cards)

Can access the till web page from iStock by clicking the links in the till page (Clicking on the tills ip adress)

Can view till reports and purse spending reports

iTill: The Ultimate Point-of-Sale Solution

User-Friendly Till Software

iTill delivers an intuitive and efficient till interface, designed to handle high volumes of transactions with ease.

Integrated FSM & Bursary Purses

Support for Free School Meals (FSM) and bursary accounts means students and staff can make cashless payments effortlessly. Topped-up accounts can be accessed instantly by tapping their cards on the scanner.

Fast & Secure Operator Login

Operators can sign in quickly and securely using a PIN code or by tapping their staff card on the reader.

Real-Time Sales & Reporting

Run Z reports from the admin tab to track daily takings, including cash, card, and bursary payments. These reports are also available in iStock for centralized financial oversight.

Flexible Payment Options

Accept card, cash, and bursary payments, providing customers with seamless checkout experiences.

Hardware Integration

iTill works seamlessly with cash drawers, barcode readers, and customer displays, ensuring a smooth transaction process at every point of sale.

Customizable Product Display

Manage your till layout directly in iStock—adjust product names, colors, positions, and prices to tailor the user experience to your business needs.

On-the-Fly Price Adjustments & Discounts

Modify prices manually at the time of sale or apply discounts such as 20% off instantly, giving you the flexibility to cater to promotional offers and customer requests.

Why Choose iTill & iStock?

Seamless Integration

A fully synchronised point-of-sale and stock management system.

User-Friendly Interface

Simple, efficient, and designed for high performance.

Robust Reporting

Gain valuable insights into sales, spending, and operational efficiency.

Flexible & Secure

Customisable features with secure login options for operators.

Scalable for Any Business

Perfect for schools, retail stores, cafeterias, and more.
