

iVISIT
SMART VISITOR MANAGEMENT
MADE SIMPLE

iVISIT

Streamline how visitors sign in, stay safe, and stay informed.

iVisit is a modern visitor management solution designed for organisations that take security, efficiency, and presentation seriously. Installed on compact desktop kiosks or tablets, iVisit gives visitors a quick, professional sign-in experience with photo capture and on-the-spot thermal label printing.

FEATURES

Walk-in or Pre-Booked Visitors
Supports spontaneous arrivals or pre-registered guests, ensuring a smooth flow through reception.

Smart Search
Visitors select who they are visiting – by name or department – before proceeding.

Photo Verification
A live photo is captured before sign-in, printed directly onto the visitor's label for clear on-site identification.

Instant Notifications
The host automatically receives an email alert confirming their visitor's arrival and the exact kiosk location.

Flexible Printing Options
Print thermal photo labels or paper slips for use in transparent holders.

Fire Register Integration
Instantly view all signed-in visitors for quick accountability during an evacuation.

Internal Booking Page
Staff can pre-book visitors, add notes, and reserve parking spaces in advance.

Smart Oversight
Any visitor not signed out is automatically flagged in the admin console, allowing for easy manual or bulk sign-out.

Calendar View
See upcoming visits at a glance – by time, day, or department.

Reception Control
Reception teams can manually sign in guests if a kiosk is unavailable.

Professional, Secure, and Integrated

iVisit integrates seamlessly with your existing access-control environment, providing a consistent and verifiable visitor record alongside staff and contractor data.
